

Since 1948, Butler Behavioral Health has been the first choice for caring, comprehensive and well-coordinated behavioral health care.

We believe in 3 core values:

- Quick and simple access to care
- Highest level of service engagement
- Inspiring our teams

Prevention. Healing. Wellbeing

# Services

## OUTPATIENT SERVICES

Your goals direct our individual, unique approach to providing you the same level of excellent service whether it be at the office, school, or home-based.

Counseling is designed around each client's specific problem(s) and vary in frequency and treatment time. When indicated, counseling will be combined with other treatment supports such as case management, medication(s), and supportive employment services. We engage in brief, solution focused interventions that seek to achieve shared treatment goals in the shortest amount of time possible.

Achieving positive treatment outcomes may involve the temporary or long term use of medication therapy. This is determined by a thorough evaluation by our psychiatric staff. When medication is part of the overall treatment plan, ongoing medication management services are provided to monitor medication effectiveness and side effects.

## INTEGRATED CARE MANAGEMENT-HEALTH NOW

Partnering with clients to build skills and support health lifestyle choices to reach goals. Offer services for all levels of need; traditional, moderate and intensive.

## CARE COORDINATION

Facilitating collaboration and coordination of care among client providers.

## SPECIALIZED SENIOR SERVICES

Home based therapy for older adults (60+) experiencing symptoms of depression and/or anxiety.

## SUPPORTIVE EMPLOYMENT SERVICES

Supportive Employment Services help develop and match a person's strengths and skills with the best possible community employment opportunity through services such as:

- Vocational preference and readiness evaluations
- Job development and job placement
- On-site job coaching
- Job retention support

## CONSULTATION & CRISIS INTERVENTION SERVICES

Case consultation and crisis intervention services for adults, children and families include:

- Telephone contacts
- Mobile Crisis Response Team offers on-site crisis intervention and hospital prescreening
- Consultation and training services to area organizations, schools and community groups regarding crisis response readiness and suicide prevention
- Post crisis follow-up and linkage to other services

## INTEGRATED CARE SERVICES

Integrated care is a comprehensive care management service that focuses on a holistic approach of mind and body to ensure overall health. Services include:

- Accessing and coordinating primary care, dental and behavioral health services
- Securing necessary individual and family supports
- Wellness programming focused on the maintenance of chronic health conditions
- Skill Building that emphasizes healthcare management

## SOCIAL CLUB

The Harbor House Social Club is an association of adults who are recovering from a major mental illness. The club's purpose is to provide its members with a supportive environment where social, recreational and learning opportunities are planned and provided by the membership.
